

Rebuilding Together
April 28, 2007

Every year Clune Construction Company participates in Rebuilding Together; a part of a national nonprofit program which sponsors National Rebuilding Day across the country on the last Saturday in April. Every year, Rebuilding Together selects a different Chicago neighborhood and south suburb in which to provide free home repair for elderly, disabled, or low income individuals.

This year as part of Rebuilding Together Metro Chicago's work day, Clune Construction had the privilege of sponsoring a well deserving family in the Englewood neighborhood on Chicago's south side. Clune was able to survey the house and with the input of the homeowner, identify specific needs to improve their living conditions. One of the larger tasks undertaken was upgrading the bathroom with a new shower, tub, new vanity, sink and faucet and tiling. Also completed was an upgrade of the kitchen with new cabinets, appliances, paint and plumbing. New flooring was provided throughout the first floor, and new ceilings were installed. To spruce up the outside of the house, the brick facade was painted, trees planted, mulch spread and lattice was installed under the deck to provide added safety. The homeowner was overjoyed to have a safer and drier residence for herself and her four foster sons.
